

Maureen and Bethany,

I hereby approve the proposal for a Paging Service for Circulating Books, dated 11 May of this year, as presented to me by the Library Steering Committee. Please work with Yongming to make any necessary changes to the Voyager configuration to enable the service, with Andrew to develop appropriate Access Services staff workflows, and with Amanda to ensure that the service is appropriately highlighted on the Library's website. You might also want to consider direct outreach to the College community as a means of advertising the service.

Thank you for putting this proposal forward and shepherding it through the governance process.

Taras
